

Key investor information document

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FIM Asset Management 50 Fund

FIM ASSET MANAGEMENT 50 GROWTH UNIT (ISIN FI0008803879)

YIELD UNIT (ISIN FI4000415112)

THE FUND IS MANAGED BY FIM ASSET MANAGEMENT LTD WHICH IS PART OF S-BANK LTD.

Objective and investment policy

The objective of the Fund's investment activity is to earn as high a return on the invested assets as possible over the long term through active fund management. The aim is to outperform the benchmark index, which is a composite of the following index basket:

Equity indices (50 %):

- MSCI USA EUR (26,0 %),
- MSCI Europe EUR (10,0 %),
- MSCI Emerging Markets Daily EUR (7,5 %),
- OMX Helsinki Benchmark CAP (4,0 %),
- MSCI Japan EUR (2,5 %),

Debt market indices (50 %):

- J.P. Morgan Cash Euro Currency 1 Month (7,5 %),
- Bloomberg Barclays Euro Aggregate Treasury Value Unhedged EUR (15,0 %),
- Bloomberg Barclays Aggregate Corporate Value Unhedged EUR (10,0 %),
- 50 % Bloomberg Barclays Emerging Markets Sovereign Unhedged EUR & 50 % Bloomberg Barclays EM Local Currency Government 10 % Country Capped Unhedged EUR (10,0 %) -total return indices and
- ICE BofAML European Currency Developed Markets High Yield Constrained index calculated in Euro (7,5 %).

The benchmark index depicts the performance of the stocks of mainly large companies operating globally in both emerging and developed markets and the return of the 1-month eurozone Euribor rate. The return index also includes dividends paid by the companies and interests paid.

The assets of the Fund are invested primarily in mutual funds managed by FIM as well as in units in other mutual funds and UCITS so that, depending on the market situation, at maximum 80 % of the Fund's assets is invested in funds that invest in the stock markets globally and at minimum 20 % of the Fund's assets in funds that invest in the fixed-income markets. The investment decisions are based on our market and equity views. Under normal circumstances approximately 50 % of the Fund's assets is invested in funds that invest in the stock markets.

The Fund uses derivatives irregularly depending on the market situation. The derivatives used are most commonly index futures, which are used to improve liquidity management and to manage exposure. The Fund does not follow the benchmark index in its investment activity, and thus its composition often differs significantly from the benchmark.

The Fund's basic currency is the euro. The Fund has one unit class, which consist of both growth and yield units. No return is paid out to the growth units. Units in the Fund may be subscribed for and redeemed on all Finnish banking days. Unitholders may redeem the units they own by notifying the fund management company of this.

More information on MSCI indexes can be found on the MSCI website (www.msci.com).

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 4 years.

Risk and reward profile

The Fund's risk category is 4. This means there is a medium risk related to the value development of the fund units. The Fund's risk category has been determined based on changes in the historical performance of a fund unit (volatility) and thus may not accurately indicate the Fund's future risk level. The Fund's risk category may rise or diminish in the future, and even the lowest risk category does not mean the investment is completely free of risk. Fund investments carry the risk of negative value development.

The biggest individual factor affecting a fund unit's value in the short term is general stock market development, but also changes in general interest rate levels or the credit risk premiums paid by issuers have a marked impact on the Fund's value.

The Fund carries a currency risk as the target funds also make investments in currencies other than the euro.

The risk indicator may not fully reflect the following risks:

— The use of derivative contracts may increase the Fund's counterparty and operational risk. The use of derivatives for hedging purposes may diminish the Fund's risk and expected return. The use of derivatives for obtaining additional returns may increase the Fund's risk and expected return.

— Credit risk: uncertainty regarding the solvency of the issuers of debt instruments. Credit risk affects the value of the Fund's fixed-income investments in cases where the credit rating of the issuer changes or credit premiums in general change.

Charges

One-off charges taken before or after you invest

Entry charge	-
Exit charge	-

Charges taken from the Fund over each year

Ongoing charge	1,63 %
----------------	--------

Charges taken from the Fund under certain specific conditions

Performance fee	-
-----------------	---

The charges paid by the investor are used to pay for the costs of running the Fund, including the costs of marketing and distributing the Fund. The charges reduce the potential return of the investment.

The charges stated are the maximum charges that may be charged for the Fund or in conjunction with an event. In some cases, the charges may be lower. Information about the actual charges is available at request from the fund management company.

The on-going charges figure is based on expenses for the year 2019 and they comprise compensation paid to the fund management company and custodian. This figure may vary from year to year. The charges do not include performance-based fees or trading fees paid by the Fund, apart from potential subscription and redemption fees paid for buying or selling units in another fund.

The management/custody fee paid to the fund management company/custodian will be deducted from the value of the fund unit class/fund in conjunction with the value calculation and paid to the fund management company/custodian monthly in arrears.

Past performance

The Fund began operations on 7.12.2005.

The graph shows the annual percentage changes in the value of the fund unit. The Fund's annual performance has been calculated after expenses, in euros. Subscription or redemption related fees or taxes have not been taken into account when calculating the performance.

The Fund's past performance does not guarantee future returns. The value of the investments may increase or decrease and investors may lose the invested assets in total or partly.

Fund's investment policy changed on 18 March 2020. The Fund previous name was FIM Balanced. The depicted past performance up until 17 March 2020 is based on the Fund's previous investment policy. Fund's investment policy changed on 2 May 2013. Before, the maximum weight of equity investments was 40%. The Fund's previous name was FIM Piano Fund. The depicted past performance up until 2 May 2013 is based on the Fund's previous investment policy.
