KEY HIGHLIGHTS

COMMENTARY

The Finnish economy fell into recession during 2023. Finland's export markets has seen a period of slow growth, whereas higher price and interest rate levels has cooled private consumption and investments. Residential construction has been particularly struggling. Recovery is in sight, however, and is expected to be gradually driven by increasing domestic and external demand. Inflation has slowed down rapidly, and economy will start to benefit from decreasing interest rate levels. Employment has remained relatively strong given the economic situation. According to the March 2024 interim forecast by the Bank of Finland, the gross domestic product (GDP) is expected to contract by 0.5% in 2023. However, the economy is gradually beginning to recover from the recession, with GDP projected to grow by 1.2% in 2025 and 1.7% in 2026.

Real housing price index and earnings level index

- Growth in real housing prices was rapid in the first decade of the 2000s and earnings growth was left behind at the time. The correction came when the housing bubble in the US burst, and the global financial crisis arrived in Finland with full force in 2008. In the 2010s, housing prices remained stable, and over a 20-year period, housing prices and the earnings level have increased in parallel with one another. In 2022 and in 2023, housing prices and transaction volumes have been under strong pressure due to higher interest rates amidst high inflation.
- The Helsinki area's housing market has diverged from the rest of the country with significantly faster price appreciation the main drivers are favourable demographics and the continuing trend in urbanisation. The national price average has maintained a stable level during last 10-year period, as price development in rural areas has been more restrained or even declining in areas that suffer most from out-migration.

BUILDING A NEW S-BANK THROUGH KEY CHANGE AREAS

TOWARDS A NEW SERVICE MODEL INCREASING FOCUS ON HIGH-VALUE CUSTOMERS

- A new S-Bank formed by combining the unique strengths of S-Bank's current digital service model, wide service network and Handelsbanken's branch offices
- Handelsbanken's service managers continue serving their customers
- Increased emphasis on attracting and retaining high-value customers.
- Achieved by increasing customer advisory services, by renewing our service model to provide an appropriate service level to each customer, and by creating new benefits linked to the customer's business volumes.
- A specific target for high-value customers will be set after the Handelsbanken transaction has been closed.

* Internal segment defined by the frequency of daily banking service use
