S&P VIEW IN A NUTSHELL

- In S&P's view, S-Bank has: an expanding retail banking franchise linked to S Group; very strong capital and earnings; sound asset quality; a comprehensive deposit-based funding profile; and adequate liquidity.
- S&P rates S-Bank above the group credit profile of S Group. This reflects its view of S-Bank as an independent and severable entity within the Group, with no funding dependency, and separated accounting and reporting procedures.
- In June 2024, S&P upgraded S-Bank's issuer credit rating from 'BBB/A-2' to 'BBB+/A-2'. At the same time, the outlook updated from positive to stable.
- S&P expects S-Bank to sustain sound profitability despite a gradual decline in market interest rates
- S&P expects the planned acquisition of Handelsbanken's portfolio in the second half of 2024 to strengthen S-Bank's retail franchise and market position, deepening banks cross-selling and scalability opportunities.

UNEMPLOYMENT RATE[1] IN THE NORDICS

CONSUMER CONFIDENCE SHOWING SIGNS OF RECOVERY

COMMENTARY

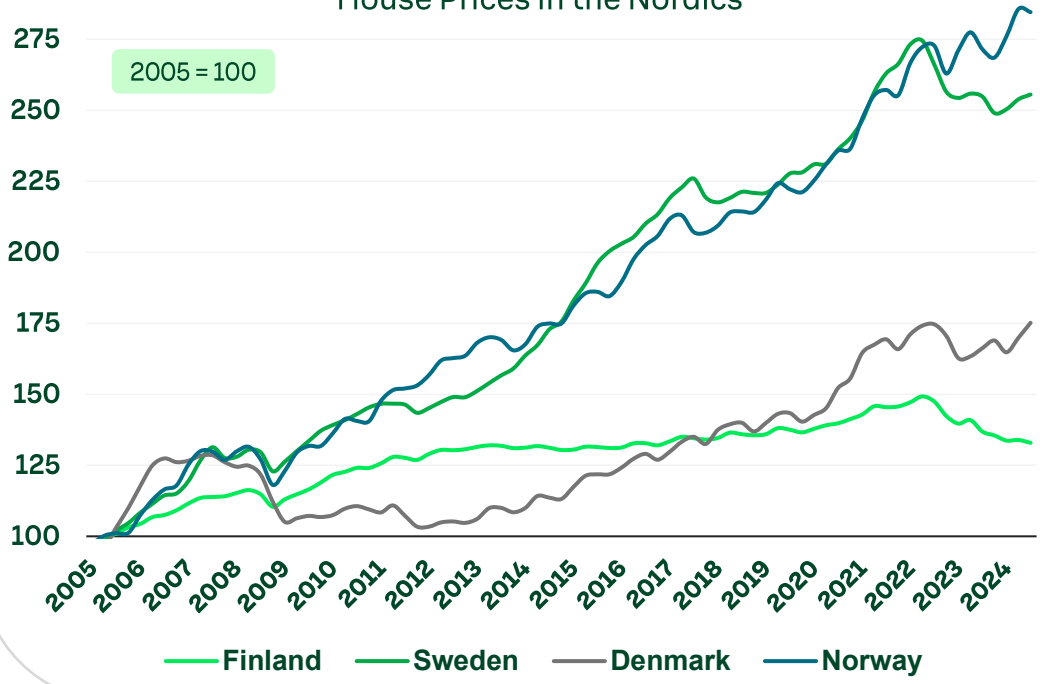

The Finnish economy is recovering from a temporary recession that occurred between 2023 and 2024. During this period, export markets experienced slower growth, while higher prices and interest rates impacted private consumption and investments. However, signs of recovery are emerging, with growth expected to pick up due to rising domestic demand. Both inflation and interest rates have decreased from their recent peaks, improving the purchasing power of households and businesses. S-Bank views stronger purchasing power, stabilizing employment, and easing inflation as key indicators of recovery and forecasts GDP growth of 1.0% in 2025 and 1.8% in 2026.

PRICE DEVELOPMENT EXPECTED TO TURN POSITIVE IN 2025[2]

Price index of old dwellings

- During the last 20 years housing prices, and the earnings level have increased steadily and in parallel with one another. Starting from 2022, housing prices have been under pressure due to higher interest rates and inflation. Both interest rates and inflation has eased since, but housing market demand still suffers from weak consumer confidence.
- However, S-Bank expects activity to pick up and price development to turn positive during this year. S-Bank forecasts price growth of 1.0% in 2025 and 3.0% in 2026 in old dwellings nationwide.
- The Helsinki area's housing market has diverged from the rest of the country with significantly faster price appreciation – the main drivers are favourable demographics and the continuing trend in urbanisation. The national price average has maintained a stable level during last 10-year period, as price development in rural areas has been more restrained or even declining in areas that suffer most from out-migration.

OUTLOOK FOR 2025
UPDATED ON 23 MAY 2025

We expect the operating profit for the whole year to decline to under EUR 100 million.

Declining interest rates and the combined penalty payment of EUR 7.67 million imposed on the bank by the Financial Supervisory Authority have a negative impact on the bank's performance, even though the Handelsbanken transaction will increase the bank's earnings.

In addition, the investments related to implementing our strategy will remain at a high level.

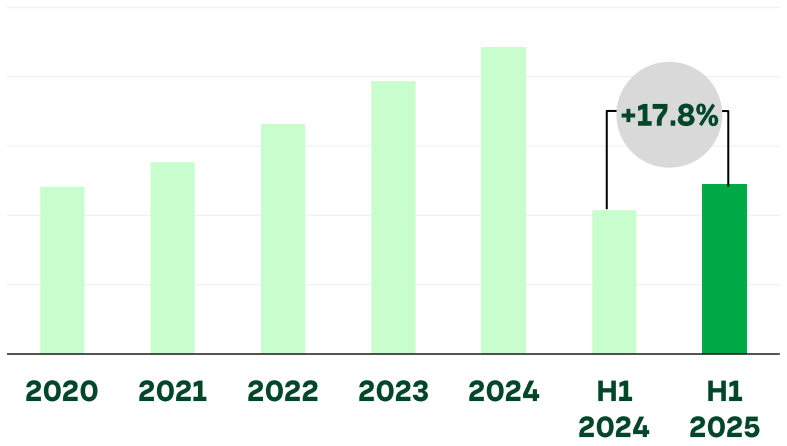

The outlook for 2025 is still subject to uncertainties regarding the operating environment, geopolitical tensions, the economy, employment and the real estate market.

DEVELOPMENT OF KEY INCOME MEASURES

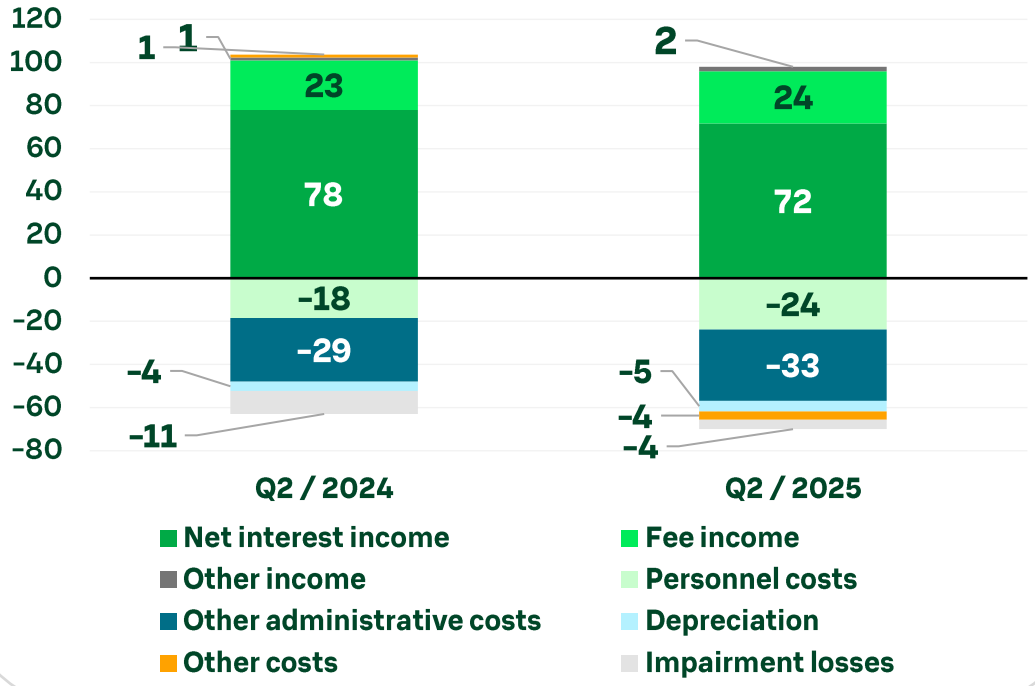

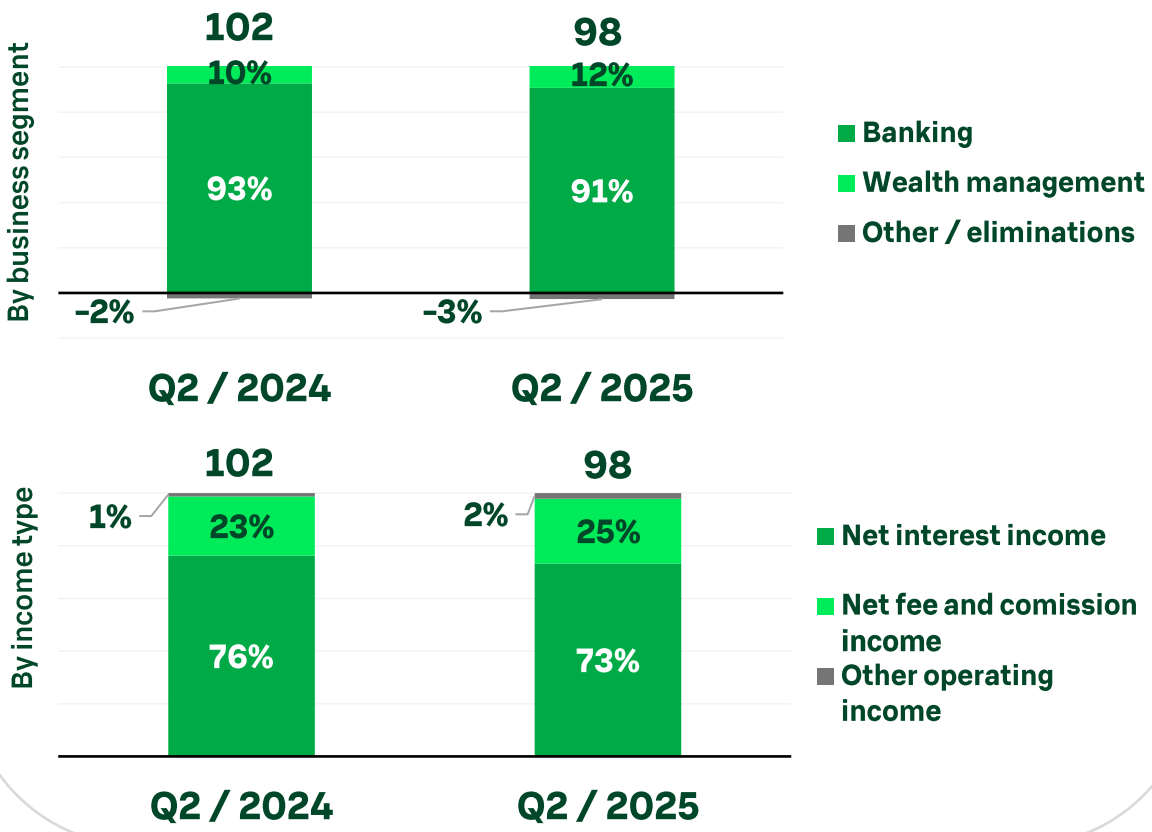

- In Q2/2025 total income was EUR 98 million which continued very moderate downward trend in total income due to interest rate cuts.
- In recent quarters net interest income has remained relatively stable and it totalled EUR 72 million in Q2/2025. SHB-deal volume and organic retail deposit growth have supported net interest income against interest rate cuts during H1/2025.
- In Q2/2025 fee income was EUR 24 million and remained stable when comparing to previous quarter. From YoY-perspective SHB-deal volumes increased fee income especially in wealth management but termination of cash services collaboration and specific card type fees affected fee income growth negatively.
- Operating expenses totalled EUR 65,6 million (50,8). The change was due to an increase in the number of personnel and IT-costs. Operating expenses and net credit losses were lower than in Q1/2025, which delivered improved profitability
